Citadel KerfLock Basalt — Grooved Basalt Pavers with Kerfing Line for Wind-Uplift Clips

Citadel Stone

Product Specification Sheet | Generated November 12, 2026

Product Information

Product Name	Citadel KerfLock Basalt — Grooved

Category	Basalt Slabs, Tiles
Finish	Grooved

Description

Citadel KerfLock Basalt grooved basalt pavers feature precision-machined kerfing lines for wind-uplift clip systems on elevated terraces and rooftops. This mechanically retained system eliminates adhesive dependency while providing superior wind resistance and individual tile replaceability. Premium volcanic basalt offers exceptional durability and slip resistance for commercial and residential applications requiring proven uplift performance.
