

QUALITY ASSURANCE OF TAZA LIMESTONE MOROCCO

Quality Assurance is our number one priority as you will not be disappointed this i can assure you ;

Our standards :

QUALITY ASSURANCE	DETAILS
NORME NF EN 1936	This European Standard specifies methods for the determination of the actual and apparent densities as well as the open and total porosities of natural stone.
NORME NF EN 13755	This European Standard specifies a method for determining the water absorption of natural stone - see EN 12670 for terminology and EN 12440 for naming criteria - by immersion in water at atmospheric pressure.
NORME NF B 10-601	This document applies to natural stone products - whose open porosity according to the NF EN 1936 standard is less than or equal to 50 percent - intended for masonry or solid stone works, wall coverings (including brick slips) , interior flooring (including pads) and exterior flooring (including roads) and bridge piers. This document does not apply to reconstituted and agglomerated stones or to composite products based on natural stone. It specifies the tolerances on the products and the instructions for use, depending on their destination in the work, and the acceptance conditions applicable to the supplies.
NORME EN 14154	This document specifies the definitions, requirements and tests of additional functionality of water meters, without metrological impact, in combination with devices with additional functionality (AFD) and in response to the EU/EFTA mandate M/441 EN.
